OVIGAL

Your gateway to the non-antibiotic era

COMPOSITION:

Silicon Acid.....	2.5 g.
Phosphorous.....	5.0 g.
Calcium.....	5.0 g.
Carrier s.q.p.....	1000 ml

DESCRIPTION:

OVIGAL is a liquid feed supplement that combines the activity of three minerals, Silicon, Phosphorous and Calcium in their organic form.

OVIGAL has been developed to improve the intestinal immune system. The natural and organic origin makes that Silicon and Phosphorous remains in ionized and more active form giving the immune system an extra stimulant.

Using **OVIGAL**, the digestive system of the laying hen will remain in a perfect condition, avoiding the action of enterobacteria being one of the main reasons of digestive problems.

OVIGAL is not a supplement of nutritional minerals like a premix, but it supports the mineral activity in an immunosuppressive status.

INDICATIONS:

- Immunoenhancer
- Prevents intestinal Colibacillosis
- Prevents external parasitosis
- Improves zoo technical parameters like improved egg weight, improved egg shell quality (less cracks!), improved egg shell color, etc.

SPECIES:

Laying hens (commercial) and broiler and layer parent stock.

DOSAGE:

- 1st treatment around 10 days before peak production during 2 days at 1 ml/liter of drinking water
- 2nd treatment around 10 days after peak production during 2 days at 1 ml/liter of drinking water
- 3rd treatment every 3 weeks during 2 days at 0.5 ml/liter of drinking water.

WITHDRAWAL PERIOD:

None

ATTENTION:

- Shake very well before using **OVIGAL**
- Keep out of light and heat
- Add **OVIGAL** to the water in the drinking water tank and stir well!

PACKING:

5 liter cans (4 cans in one box). Other packing is available.
